

By Elibekyan

Product / Design / Engineering

I turn interfaces, workflows, and content into working systems: from idea and prototype to a measurable result.

Yerevan / remote / selective projects | hello@byelibekyan.com | cv.byelibekyan.com/en

Core capabilities

Product I clarify the task, user scenarios, constraints, and success measures before visual work begins.

Design I design interfaces, design systems, prototypes, and clear presentations of product decisions.

Engineering I work directly with code: structure, frontend, integrations, and MVP launch details.

Experience

2024-2026 / Independent Product and design systems work - By Elibekyan ecosystem structure, Atlas Archive, visual prototypes, content models, and subdomain routes.

2021-2024 / Projects Interfaces, automations and launch materials - prototyping, documentation, product pages, user-flow scenarios, and team communication support.

Earlier / Foundation Visual, technical and operational base - visual taste, engineering logic, and attention to how people read and use products.

Selected projects

By Elibekyan ecosystem Next.js / TypeScript / UI package / tokens. A monorepo for root, PH, Blog, CV, and Design.

CV professional dossier RU/EN, PDF downloads, timeline, project evidence, skills, contact routes and JSON-LD structured data.

Photography archive A cinematic photo archive with albums, places, stories, and a distinct visual tone.

Blog reading room MDX, article index, RSS and taxonomy for essays, notes and project logs.

Skills

Discovery Briefs, audits, scenario maps, MVP framing, content models.

Interface Wireframes, visual systems, responsive layouts, accessibility, prototype behavior.

Frontend HTML/CSS/JS, React / Next.js, design tokens, semantic markup, local prototypes.

Communication Documentation, presentations, case studies, editing, translation between roles.
